## DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 112***

Claims 19-28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The invention is not enabled for the claimed method. Applicant argues that one of ordinary skill in the art would know how to administer the claimed invention, but that is not the issue at hand. Alzheimer's disease, senile dementia and Parkinson's disease are all diseases for which there is no known cure. Thus, the level of enablement to treat (alleviate)/cure (protect against) them is quite high. Applicant's claims are drawn to a method which is very unbelievable on its face. This is due to the fact that there is no cure for these conditions/diseases. Thus, without conclusive evidence to show that these conditions have been cured, the invention is not enabled by the instant specification.

Applicant argues that they are not curing or preventing Alzheimer's or Parkinson's which have no known cure but in fact they are allegedly protecting/alleviating against the symptoms of a neurological disorder mediated by accelerated rates of apoptosis which still reads on curing or preventing diseases such as Parkinson's since these diseases are mediated by accelerated rates of apoptosis. Applicant even admits on page 6 of their specification that increased rates in apoptosis are known to occur in disease/conditions such as Alzheimer's and Parkinson's.

Thus the claims are properly rejected under this section.
